

## NORTHFIELD METAL PRODUCTS

# COATING INNOVATION

Innovation is the key to our production and more importantly to our clients. Northfield Metal Products offers the latest Technology in finishing and substrate combinations. Recent developments in Powder Coating allow Northfield to deliver all the performance advantages of Powder Coating applied to conductive and non conductive substrates.

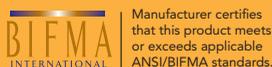

*"We're committed to reducing our impact on the planet and delivering more sustainable products and solutions to our customers."*

While Aluminum offers all of its traditional advantages, we offer a unique range of next generation Powder Coated Nylon substrate solutions. New coating combinations are now available specifically for Nylon substrate. We offer single coat colour, dual coat (colour and topcoat) and various textures. In addition, we offer the latest in Acrylic Clear Powder solutions for the protection of highly polished aluminum.

Powder Coated products have many environmental benefits. A powder coating is made up of raw materials, similar to other coatings, but without organic solvents. As a result there is no volatile release of organic compounds (VOCs) into the atmosphere during application.

### THE ADVANTAGES OF POWDER COATINGS "THE GREEN SOLUTION"

- contain no solvent
- emit no VOC's (volatile organic compounds)
- produce much thicker coatings without running or sagging
- overspray can be recycled and reused (no wastage)
- production lines produce less hazardous waste than conventional liquid coatings
- extra durability and cleanup capability
- noted for potential additional LEEDS credits
